Physics 110 - by Conceptual Objective

Andrew Morrison

Joliet Junior College

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

TABLE OF CONTENTS

Licensing

1: Prelude to the Physics of Hearing

1: Conceptual Objective 1

- 1.1: Introduction to One-Dimensional Kinematics
- 1.2: Displacement
- 1.3: Prelude to the Physics of Hearing
- 1.4: Sound
- 1.5: Vectors, Scalars, and Coordinate Systems
- 1.6: Time, Velocity, and Speed
- 1.7: Acceleration
- 1.8: Newton's First Law of Motion - Inertia
- 1.9: Newton's Second Law of Motion- Concept of a System
- 1.10: Newton's Third Law

2: Conceptual Objective 2a and 2b

- 2.1: Spring Force- Hooke's Law
- 2.2: Elasticity - Stress and Strain
- 2.3: Period and Frequency in Oscillations
- 2.4: Simple Harmonic Motion- A Special Periodic Motion
- 2.5: Natural Frequency
- 2.6: The Simple Pendulum
- 2.7: Simple Harmonic Motion and Oscillations
 - 2.7.1: Anatomy of an Oscillation
 - 2.7.2: Characteristics of Oscillations
- 2.8: Energy and the Simple Harmonic Oscillator

3: Conceptual Objective 3

- 3.1: Traveling waves
 - 3.1.1: Wave basics
 - 3.1.2: Wave anatomy
 - 3.1.3: Microscopic model
- 3.2: Waves and Oscillations
 - 3.2.1: Transverse Waves
 - 3.2.2: Longitudinal Waves
 - 3.2.3: Wave Speeds in Materials

4: Conceptual Objective 4

- 4.1: Coupled Oscillators and Normal Modes
- 4.2: Coupled Oscillators (Advanced)

5: Conceptual Objective 5

- 5.1: Prelude to Oscillatory Motion and Waves
- 5.2: Prelude to Sound

- 5.3: Sound Waves
- 5.4: Speed of Sound
- 5.5: How sound moves

6: Conceptual Objective 6

- 6.1: Waves
- 6.2: Frequency and Pitch of Sound
- 6.3: Speed of Sound, Frequency, and Wavelength

7: Conceptual Objective 7

- 7.1: Wave Behavior
- 7.2: Mirrors and Reflection
 - 7.2.1: Reflection
 - 7.2.2: Reflection Simulation
- 7.3: Refraction
 - 7.3.1: Refraction
 - 7.3.2: Refraction Simulation
- 7.4: Diffraction
 - 7.4.1: Diffraction
 - 7.4.2: Diffraction and Diffraction Simulation

8: Conceptual Objective 8

- 8.1: Interference
 - 8.1.1: Principle of superposition
 - 8.1.2: Sine waves, phase and interference
 - 8.1.3: How to make standing waves
 - 8.1.4: Interference in two dimensions
- 8.2: Adding Wave Pulses
 - 8.2.1: Adding Waves
 - 8.2.2: Adding Two Wave Pulses (Superposition)
- 8.3: Adding Sinusoidal Waves
 - 8.3.1: Adding Two Linear Waves Simulation
- 8.4: Path Difference
 - 8.4.1: Interference
 - 8.4.2: Interference Due to Path Difference Simulation
- 8.5: Superposition and Interference
- 8.6: Interference
 - 8.6.1: Interference- Ripple Tank Simulation

9: Conceptual Objective 9

- 9.1: Doppler Effect
- 9.2: Doppler Effect and Sonic Booms
- 9.3: Doppler Shift
 - 9.3.1: Doppler Shift
 - 9.3.2: The Doppler Effect Simulation

10: Conceptual Objective 10

- 10.1: Vibrating strings
- 10.2: Driven String and Resonance
 - 10.2.1: String Resonance
 - 10.2.2: Driven String Simulation

11: Conceptual Objective 11

- 11.1: Sound Interference and Resonance- Standing Waves in Air Columns
- 11.2: Standing Waves in a Tube
 - 11.2.1: Tube Resonance
 - 11.2.2: Standing Wave Simulation
- 11.3: Reflection of Waves at a Boundary
 - 11.3.1: Reflection of Waves
 - 11.3.2: Reflection Simulation

12: Conceptual Objective 12

- 12.1: Perception of sound
 - 12.1.1: Subjective impressions
 - 12.1.2: What drives perception
- 12.2: Hearing
- 12.3: Intensity and Loudness of Sound
- 12.4: Sound Intensity and Sound Level
- 12.5: Loudness Perception
 - 12.5.1: Pressure amplitude
 - 12.5.2: Sound Intensity
 - 12.5.3: Decibels and sound levels
 - 12.5.4: Decibels (the math)
 - 12.5.5: Frequency and loudness perception
 - 12.5.6: Intensity and Distance
- 12.6: Pitch, Loudness and Timbre
 - 12.6.1: Pitch, Loudness and Timbre
 - 12.6.1.1: Pitch
 - 12.6.1.2: Loudness
 - 12.6.1.3: The Decibel Scale
 - 12.6.1.4: Just Noticeable Difference
 - 12.6.1.5: Timbre (the first time)

13: Conceptual Objective 13

- 13.1: Frequency and pitch- How do we know?
- 13.2: Sound Texture
 - 13.2.1: Wave Shape
 - 13.2.2: Sound Waveforms Simulation
- 13.3: Harmonic Series I- Timbre and Octaves

14: Conceptual Objective 14

- 14.1: Interpreting graphs
- 14.2: Fourier Series

- 14.2.1: Fourier Series
- 14.2.2: Fourier Analysis
- 14.2.3: Fourier Series Simulation
- 14.2.4: Timbre (again!)
- 14.3: Microphone Sound Analyzer
 - 14.3.1: Fourier Analysis of Microphone Data

15: Conceptual Objective 15

- 15.1: Frequency ratios and pitch perception
- 15.2: Musical intervals and temperament
- 15.3: Beats

16: Conceptual Objective 16

- 16.1: More about strings
- 16.2: Plucked String
 - 16.2.1: Plucked String
 - 16.2.2: Plucked String Simulation
- 16.3: Vibrating Plates Simulation
 - 16.3.1: Surface Resonances
 - 16.3.2: Vibrating Plate Simulation
 - 16.3.3: Other Surfaces
 - 16.3.4: Volume or Helmholtz Resonance
 - 16.3.5: Stringed Instruments
- 16.4: How an Acoustic Guitar Works
- 16.5: Acoustics in Violins

17: Conceptual Objective 17

- 17.1: Sources of Musical Sound
- 17.2: Brass Acoustics
- 17.3: Vibrating air columns
- 17.4: Impedance
- 17.5: Impedance Simulation
- 17.6: Brass Instruments

18: Conceptual Objective 18

- 18.1: Woodwind Instruments
- 18.2: Physics of sound production
- 18.3: Pipe Organs and Other Reed Instruments
- 18.4: Helmholtz resonators

19: Conceptual Objective 19

- 19.1: Other resonators
- 19.2: Percussion
 - 19.2.1: Percussion and Drumheads
 - 19.2.1.1: Vibrating Membranes
 - 19.2.1.2: Circular Drum Head Simulation
 - 19.2.1.3: Drums
 - 19.2.1.4: Harmonic Percussion Instruments

- [19.2.1.5: Other Musical Instruments](#)
- [19.3: Basic Acoustics of the Marimba](#)
- [19.4: Bessel Functions and the Kettledrum](#)

20: Homework for practice

- [20.1: Vibrations- Review and homework](#)
- [20.2: Oscillations and Waves \(Exercise\)](#)
- [20.3: Oscillatory Motion and Waves \(Exercises\)](#)
- [20.4: Traveling Waves- Review and Homework](#)
- [20.5: Interference- Review and homework](#)
- [20.6: Physics of Hearing \(Exercises\)](#)
- [20.7: Perception of sound- Review and homework](#)
- [20.8: Review and Homework- Standing waves and resonance](#)
