This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

TABLE OF CONTENTS

Licensing

1: Review of Fundamentals

- 1.1: Terminology- Mechanics and dynamics
- 1.2: Kinematics- Basic Notions
- 1.3: Dynamics- Newton Laws
- 1.4: Conservation Laws
- 1.5: Potential Energy and Equilibrium
- 1.6: OK, Can We Go Home Now?
- 1.7: Self-test Problems

2: Lagrangian Analytical Mechanics

- 2.1: Lagrange Equation
- 2.2: Three Simple Examples
- 2.3: Hamiltonian Function and Energy
- 2.4: Other Conservation Laws
- 2.5: Exercise Problems

3: A Few Simple Problems

- 3.1: One-dimensional and 1D-reducible Systems
- 3.2: Equilibrium and Stability
- 3.3: Hamiltonian 1D Systems
- 3.4: Planetary Problems
- 3.5: Elastic Scattering
- 3.6: Exercise Problems

4: Rigid Body Motion

- 4.1: Translation and Rotation
- 4.2: Inertia Tensor
- 4.3: Fixed-axis Rotation
- 4.4: Free Rotation
- 4.5: Torque-induced Precession
- 4.6: Non-inertial Reference Frames
- 4.7: Exercise Problems

5: Oscillations

- 5.1: Free and Forced Oscillations
- 5.2: Weakly Nonlinear Oscillations
- 5.3: Reduced Equations
- 5.4: Self-oscillations and Phase Locking
- 5.5: Parametric Excitation
- 5.6: Fixed Point Classification
- 5.7: Numerical Approaches
- 5.8: Harmonic and Subharmonic Oscillations
- 5.9: Exercise Problems

6: From Oscillations to Waves

- 6.1: Two Coupled Oscillators
- 6.2: N Coupled Oscillators
- 6.3: 1D Waves
- 6.4: Acoustic Waves
- 6.5: Standing Waves
- 6.6: Wave Decay and Attenuation
- 6.7: Nonlinear and Parametric Effects
- 6.8: Exercise Problems

7: Deformations and Elasticity

- 7.1: Strain
- 7.2: Stress
- 7.3: Hooke's Law
- 7.4: Equilibrium
- 7.5: Rod Bending
- 7.6: Rod Torsion
- 7.7: 3D Acoustic Waves
- 7.8: Elastic Waves in Thin Rods
- 7.9: Exercise Problems

8: Fluid Mechanics

- 8.1: Hydrostatics
- 8.2: Surface Tension Effects
- 8.3: Kinematics
- 8.4: Dynamics - Ideal Fluids
- 8.5: Dynamics- Viscous Fluids
- 8.6: Turbulence
- 8.7: Exercise Problems

9: Deterministic Chaos

- 9.1: Chaos in Maps
- 9.2: Chaos in Dynamic Systems
- 9.3: Chaos in Hamiltonian Systems
- 9.4: Chaos and Turbulence
- 9.5: Exercise Problems

10: A Bit More of Analytical Mechanics

- 10.1: Hamilton Equations
- 10.2: Adiabatic Invariance
- 10.3: The Hamilton Principle
- 10.4: The Hamilton-Jacobi Equation
- 10.5: Exercise Problems
