Time Series Analysis

Alexander Aue

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

TABLE OF CONTENTS

Licensing

1: Basic Concepts in Time Series

- 1.1: Introduction and Examples
- 1.2: Stationary Time Series
- 1.3: Eliminating Trend Components
- 1.4: Eliminating Trend and Seasonal Components
- 1.5: Assessing the Residuals
- 1.6: Summary

2: The Estimation of Mean and Covariances

- 2.1: Estimation of the Mean
- 2.2: Estimation of the Autocovariance Function

3: ARMA Processes

- 3.1: Introduction to Autoregressive Moving Average (ARMA) Processes
- 3.2: Causality and Invertibility
- 3.3: The PACF of a Causal ARMA Process
- 3.4: Forecasting
- 3.5: Parameter Estimation
- 3.6: Model Selection
- 3.7: Summary

4: Spectral Analysis

- 4.1: Introduction to Spectral Analysis
- 4.2: The Spectral Density and the Periodogram
- 4.3: Large Sample Properties
- 4.4: Linear Filtering
- 4.5: Summary
